

# PRODUCT INFORMATION

## SEAM SEALER 816

SEAM SEALER 816 is a solvent soluble resin designed to seal the seams of metal containers, in which fatty foods, such as lard, are packaged. It meets the requirements of adhesives as covered under CFR 21, Section 175.105 and Section 175.300. It is quick drying and helps prevent flash rusting.

### CHARACTERISTICS:

Appearance: Clear semi-viscous liquid

Solubility: Insoluble in water

### RECOMMENDATIONS:

Use SEAM SEALER 816 at full strength to seal seams on metal containers. If a lower viscosity is desired, add isopropyl alcohol until proper consistency is obtained. Permit cans to air dry or use heat lamps or dryers to dry resin.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of the numerous factors affecting results. Paradigm Lab's products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products.

Statements concerning the use of Paradigm Lab's products are not be construed as recommending the infringement of any patent, and no liability for infringement arising out of any such use is assumed.
