

PRODUCT INFORMATION

RESYN 733C

RESYN 733C is a self-crosslinking resin which can be used as an anticurl, a backing for woven fabrics, a stiffening agent, or in edge gum. It should be applied only on fabrics from which it will not have to be removed. RESYN 733C will crosslink to itself at relatively low temperatures making it difficult to remove from most substrates.

SPECIFICATIONS:

Appearance:	White liquid
Type:	Nonionic
pH:	4.0 - 5.0
Solubility:	Easily dispersed in water, forms white solution
Specific Gravity:	1.05
Odor:	Mild
Water resistance:	Good

RECOMMENDED USAGE:

Use at 1-100% depending on the application. As an anticurl, 1-5% is recommended. As a back coating, 10-25% is recommended. As an edge gum, 30-50% is recommended.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of the numerous factors affecting results. Paradigm Lab's products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products.
