

# PRODUCT INFORMATION

## PARASTAT C

PARASTAT C is an anti-static agent for use on polyester, synthetic fibers, yarns, and fabrics. PARASTAT C can also be used in the manufacturing of non-woven paper products such as disposable medical wear and paper wipes for medical and electronics.

### SPECIFICATIONS:

Appearance:	Amber-colored liquid
Ionic Character:	Weakly cationic
pH (2% solution):	5-6
Solubility:	Readily soluble in water
Stability:	Excellent storage stability
Compatibility:	Compatible with dilute solutions of acids, alkalis, and salts; compatible with nonionic and cationic softeners and dye fixatives. Also compatible with cationic and nonionic dewatering polymers.

### APPLICATIONS:

PARASTAT C may be applied either by exhaustion in the last rinse or by pad application. The percentage required will vary with mill conditions but generally 1/4% based on the weight of the fabric will be ample for static elimination. Percentages of 1/4% to 1/2% based on the weight of the solution are recommended as a start for pad application.

PARASTAT C has a broad range of compatibilities and has found use in a wide variety of textile finishing formulas.

**PAPER:** Use PARASTAT C in sheet forming to promote static free processing. PARASTAT C can also be applied to finished paper with sprays to enhance antistatic characteristics.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of the numerous factors affecting results. Paradigm Lab's products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products.

Statements concerning the use of Paradigm Lab's products are not be construed as recommending the infringement of any patent, and no liability for infringement arising out of any such use is assumed.
