

# PRODUCT INFORMATION

## PARATEX BG-355

PARATEX™ BG-355 is a high quality, high solids water based resin that is designed for easy application, quick penetration, and fast dry time. It is used as a backcoating, anticurl, hand builder, fabric stabilizer, and laminating adhesive. It dries to a firm clear thermoplastic film. It is formaldehyde free, safe, and easy to use. PARATEX™ BG-355 resists yellowing at temperatures up to 300°F.

### PHYSICAL PROPERTIES

Appearance:	White semi-viscous liquid
Solids:	54 – 56%
Water Solubility:	Completely dispersible
Specific Gravity:	1.11
pH:	4.0 – 6.0
Ionic Characteristics:	Nonionic

**DIRECTIONS:** PARATEX™ BG-355 is used in concentrations from 2% to 50% depending on the degree of stiffness required and the desired use. When padding onto cloth as an anticurl, hand builder, or stabilizer start with a 10% solution and adjust for desired hand. Agitation may be required in the feed tank.

If kiss rolling onto the back of fabric, start with a 50% solution. If an extremely stiff backcoating is needed, use at full strength.

PARATEX™ BG-355 acts as an excellent adhesive to bond two fabrics together. Spray a light film on one of the substrates and dry thoroughly through a frame.

Clean up with water. If dried, use Rez Away™ to remove residue.
