

PRODUCT INFORMATION

PHARAGENT 100

PHARAGENT 100 is an economical, convenient and easy to use substitute for soda ash in the dyeing process. PHARAGENT 100 can also be used to raise the pH in the peroxide bleaching process.

SPECIFICATIONS:

Appearance:	Clear liquid
Specific Gravity:	1.51
pH (2% solution):	12.55
Freezing Point:	Store above 40 ^o F

APPLICATION:

PHARAGENT 100 is a liquid, easy to use soda ash replacement for raising the pH of a dye bath for several reasons. It will help direct dyes exhaust onto the fabric by raising the pH slightly (7.5 -8.0). Use recommendation is .1 - .5 depending on the type of equipment and pH of the water.

PHARAGENT 100 is also used to raise the pH in dyeing reactive dyes and basic dyes to activate the dye molecule.

PHARAGENT 100 will act to raise the pH between 8.5 and 10.5 so that the pH of the dye bath remains stable during the entire dyeing procedure.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of the numerous factors affecting results. Paradigm Lab's products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products.
