

PRODUCT INFORMATION

PARACRYL 387

PARACRYL 387 is a cross-linking acrylic polymer designed to provide a soft hand while stabilizing both natural and man-made fibers. It is nonionic and water soluble.

SPECIFICATIONS:

Appearance:	White liquid
pH:	4.5 ± .5
Solubility:	Soluble in water
Odor:	Mild, sweet odor
Specific Gravity:	1.07
Ionic Characteristic:	Nonionic
T _G :	-30
Solids:	50%

APPLICATION:

PARACRYL 387 is recommended for use by itself or with other finishing products. Due to the fact that it is nonionic it is compatible in most finishing processes. Recommended usage is 2-10% depending on the type of fabric and amount of stabilizing required.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of the numerous factors affecting results. Paradigm Lab's products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products.

Statements concerning the use of Paradigm Lab's products are not be construed as recommending the infringement of any patent, and no liability for infringement arising out of any such use is assumed.
