

PRODUCT INFORMATION

N-100

N-100 is a 100% active nonionic surfactant used for cleaning plastics, metals, and other hard surfaces. It is completely soluble in water. N-100 can be used to remove oils, greases, adhesives, and most soils found in industry today. It contains special solubility agents to permit more activity on soils and to let it completely disperse throughout the cleaning system.

SPECIFICATIONS:

| | |
|------------------------|-----------------------------|
| Appearance: | Clear, viscous liquid |
| pH: | 6.5 ± 1.0 |
| Solubility: | Completely soluble in water |
| Ionic Characteristics: | Nonionic |
| Activity: | 100% |

APPLICATION:

N-100 can be used in concentrations of .1% to 2.0% depending on the soils being removed. Some soils such as heavy oils, greases, adhesives, and waxes may be removed best by using a highly caustic cleaner like Paraclean OMY in conjunction with N-100.

The data and suggested formulations in this bulletin are based on information believed to be reliable and are offered solely for evaluation, investigation and verification of the numerous factors affecting results. Paradigm Lab's products are sold with the understanding the purchasers will make their own tests to determine the suitability of these products for the particular use. We assume no liability or responsibility for any damage to person or property resulting from or incident to the use of our products.

Statements concerning the use of Paradigm Lab's products are not be construed as recommending the infringement of any patent, and no liability for infringement arising out of any such use is assumed.
